

WIRELINE — RETRIEVABLE FLOAT VALVES

PRODUCT FEATURES

High Flow Capacity: CPC Wireline Retrievable Float Valves are designed to handle even the most demanding drilling operations, ensuring efficient flow through the wellbore.

Wide Pressure Range: Available in both high (5000 psi) and low (500 psi) pressure ratings, offering the flexibility to adapt to your specific project requirements.

Enhanced Design: Engineered with superior durability and extended service life, our float valves withstand challenging environments and deliver long-lasting performance.

EN30B High-Quality Material: Each valve is meticulously crafted from EN30B steel, guaranteeing exceptional strength and resistance to wear and tear for years to come.

Serialized with Full Traceability: Every component is rigorously inspected and serialized for complete transparency and quality assurance.

In-house Inspection and Redress: Our commitment to quality extends beyond production, with inspection and redress procedures ensuring your valves meet the highest standards.

Extensive Connection Options: Choose from a wide selection of standard API connection types/sizes (3-1/2" IF, 4" FH, 4-1/2" IF) or explore the availability of special threads (DS 40, DS 39, CET 43, CET 39, CET 40).

Customizable Solutions: We understand that every wellbore is unique, which is why we offer the ability to customize your valve's connection type to perfectly match your specific needs.

Complete Packages: Each package includes all the necessary floats and spares, along with bleed off tools and hoses for effortless installation and operation.
